Organized storage. Improved productivity. Inventive technology. Capsa Healthcare provides the right medication management products to help you deliver better care in assisted living, skilled nursing, and long-term care settings.

The most comprehensive product suite in the industry is all right here - Medication Carts and Cabinets, Computing Workstations, Medical Carts, Advanced Medication Management Systems, and Inventory Solutions. Capsa delivers precisely what your facility requires!

Over 99% of Capsa products are delivered on-time to our customers’ sites.

Over 99% of Capsa products pass our rigorous 55-point QC process the first time.

Capsa Healthcare Overview

- Headquartered in Portland, Oregon with additional sales, management, and manufacturing operation in Columbus, Ohio, Charlotte, North Carolina, Chicago, Illinois, and Mississauga, Ontario

- Product installations in over 70 countries and thousands of healthcare facilities worldwide

- Our comprehensive product suite ensures medication administration accuracy and control from the pharmacy to the patient, and greatly improves the efficiency of the nursing staff
AVALO® SERIES
MEDICATION CARTS
Avalo Series medication carts excel in areas that make the difference for nurses, like easy usage and access, a wide range of drawer configurations, enormous capacity, and smooth drawer action. For the pharmacy, Avalo yields consistently high user ratings, proven lock systems, and the ability to refurbish panels for lasting value.

The Avalo Difference
- Modular design for simple component replacement and refurbishing
- Support virtually all medication delivery systems including punch cards, auto-packaging, unit dose box
- High-density panels prevent denting or corrosion
- 3", 6", and 10" seamless drawers
- Unique integrated drawer divider system
- Full selection of accessories and lock systems
- Maximize work space with several computing mount options for EMR/EHR.

Avalo Medication Carts are long-lasting and a superior value.

**NEW** from Capsa Healthcare! The Avalo Woodblend Series medication cart line features enhanced styling and improved modularity to facilitate component replacement and refurbishing. Modern healthcare providers will appreciate the superior organization of medication administration systems and clinical supplies. Avalo’s long-term value provides the pharmacy a lower cost of ownership and improved cost management.

**The Avalo Woodblend Difference**
- Modular design for simple component replacement and refurbishing
- High-density panels maintain like-new appearance and offer enhanced durability
- Wide array of configurations available featuring 3", 6", and 10" seamless drawers
- Full selection of computer arm and tray systems for EHR/eMAR software, plus multiple accessories and locking options
- Premium casters simplify cart movement by 20%

**PCL punch card cart**

**UDL automated packaging cart**
shown in Northern Cherry with optional accessories

**Easier to Maneuver**

**Mobilize EMR/EHR**

**Available In 3 Widths**
Choose the lock system that best meets the environment’s specific needs.

**Lock System Choices**

**AutoLock™ Automatic Relocking System**

Automatically secures a motionless unlocked medication cart with a user-defined relock time delay from 1-99 minutes. The system also permits the use of up to 5,000 individual user codes.

See available upgrades below.

**Keyless Access with Manual Relocking**

Simply enter a 4-digit access code, push down the lock lever and the cart is ready for access. To secure the medication cart, push in the lock lever. Clear visual indication of lock status is apparent from a distance.

**Key Access with Manual Relocking (standard)**

Featuring the Best® Core Removable Lock System, this basic yet proven lock system provides you with the flexibility to change keys to the medication cart easily. Standard on Avalo carts.

**AutoLock™ Upgrades**

**ID Badge Access**

Use a mag stripe or bar code card as the primary or secondary access requirement.

**Proximity Access**

An advanced proximity card reader can be selected as an additional security access requirement.

**Audit Tracking**

Authorized users can track cart activity, including user access and relocking for over 2,000 events.

**AutoLock™** automatically secures a motionless unlocked medication cart with a user-defined relock time.

Maximum capacity and organization are hallmarks of Capsa Healthcare’s M-Series medication carts. Pharmacies appreciate the multiple locking options and proven security, a fast return on investment, and trouble-free usage. Nurses find M-Series to be simple to access medications and supplies, and effortless to guide and open; plus drawers are infinitely customizable. Finally, sleek styling tops off the popular M-Series.

The M-Series Difference

- Support virtually all medication delivery systems including punch cards, auto-packaging, unit dose box
- Lightweight, superior durability
- 3”, 6”, and 10” drawers
- Full selection of accessories
- Choice of lock security systems
- Maximize work space with several computing mount options for EMR/EHR.

Inquire about our Medication Cabinets
NexsysADC™ is the simplest, most secure technology to fully manage the onsite storage and distribution of medications (especially controls), STAT/first doses, and supplies. With NexsysADC, the level of security you need and expect is only a fraction of the price of alternative automated dispensing cabinets. The pharmacy benefits from a faster ROI without compromising safety, security, or operational flexibility. And the facility benefits from having the new Stat or 1st dose on-hand at the exact time it’s needed.

The NexsysADC Difference

• **Medication Security:** Innovative solution to manage the restocking and access of controls and high-value medications.
• **Fast ROI Without Compromise:** Your Capsa Representative will run a detailed analysis to show how pharmacies can deploy NexsysADC in more facilities for broader control and higher customer satisfaction, compared to alternative ADCs.
• **Efficient Stat Dose/E-kit Delivery:** Eliminates manual methods like the “tackle box” commonly used in extended care settings. Significantly lowers costs associated with stat deliveries, and improves audit accuracy (no more missing paperwork).
• **Configurable For Each Facility:** Available in a standard cabinet and new countertop unit. Each NexsysADC is custom-built for your specific needs and patient population.
• **Streamlined Replenishment & Inventory:** NexsysADC identifies what medications need to be restocked. The flexible replenishment process saves time, reduces inventory turns, and prevents diversion.

NexsysADC is where automated dispensing meets inventive, common-sense design that provides configurable security and storage for a host of healthcare environments.

• Extended care nursing homes
• Critical access hospitals
• Surgery centers
• Group homes
• Residential care facilities
• Rehab and psych environments
• Animal health and dental clinics
• Hospice
• Education Simulation

When space and formulary size matter, choose the new NexsysADC 4T countertop model. The medication security you need in the size you want.

NexsysADC™ 4T is countertop-sized with the full security, tracking, and inventory management of Capsa’s main cabinet model. NexsysADC 4T fits any environment where tight medication control is required, but small space, budget or formulary also are a consideration.
NexsysADC™ Guided Access With ‘CAM’ Technology

NexsysADC relies on guided access with multiple levels of illuminated and on-screen prompts. This ensures the nursing staff IDs the exact location of the medication, and picks the right medication for the right patient. Guided access technology also ensures that pharmacy restocking and inventory control are accurately and efficiently performed.

The NexsysADC Controlled Access Module (CAM)

Controlled Access Modules, or CAMs, are at the heart of NexsysADC operation for controlled and high-value medications.

For CAM medications, the CAM automatically opens, and the correct med cell is ID’d with a pick-to-light prompt and opened lid. NexsysADC includes built-in alerts against tampering.

Each CAM is configurable for up to 25 SKUs in individual locking cells (1x1, 1x2, or 2x2).

Scalable cabinet design permits unique set-up of NexsysADC with a mix of CAMs, open-cell medication bins, and supply drawers.

Transferable CAM inserts streamline inventory counts, restocking, and medication distribution workflow to and from the pharmacy.

3 popular NexsysADC™ 4T configurations

Fill the four tiers with 1, 2 or 4 CAMs, plus dividable open cell medication bins for routine meds, and 3”, 6”, or 9” drawers for supplies.

General Specifications

Main Cabinet Model:
- Cabinet size 43”(h) 24”(d) 25”(w)

Ethernet, WiFi networking
Built-in uninterrupted power supply
NexsysADC™
Pharmacy-To-Facility Medication Management

Cloud-Based For Continuity

NexsysADC is enabled by a robust cloud solution for superior information management and maximum uptime. From anywhere, at anytime, the NexsysADC web portal provides access to all your system management functions. All essential patient medication transactions and administrative functions are captured, such as full activity and user reporting, charge capture, and restock management.

Interfaced With Your Pharmacy System

NexsysADC interfaces with your pharmacy management system with our robust 2-way Pulse Interface Engine (HL7). Every step of the process is connected:

- **Patient Sync** for true patient validation reduces the chance of medication errors.
- **Patient Order Sync** only allows dispensed medications against approved orders.
- **Billing Syncs** ends charges electronically to the pharmacy system, eliminating manual billing and avoiding revenue loss.

Uncompromising Data Security

Our NexsysADC technology meets the highest standards for cyber security and HIPAA compliance.

Implementing NexsysADC

Capsa Healthcare makes the planning, installation and training of NexsysADC simple and straightforward. Our Support team focuses on the unique needs of each user, from management to end user. And once installed, Capsa provides a dedicated NexsysADC Support Hotline for pharmacies and facilities.

- High-detail project management
- On-site pharmacy training
- On-site facility training
- 24/7 dedicated support

- Flexible computer positioning and adjustment to save cart-top workspace
- Open-platform design accommodates self-powered hardware including laptop, tablet, and All-In-One computers
- Multiple models accommodate a wide range of medication systems including punch card, 30-day box, and automated packaging

Also available as Vintage Encore
**M38e Telepresence Cart**

The M38e Telepresence Cart is equipped to enable video communication to enhance your telehealth workflow with real-time consultation, connecting doctors with remote patients in real time, increasing access and timeliness to care.

**Features**
- Optional mounts for video or web camera above the monitor
- Optional I/O Pod for integrating peripherals
- Configurable with your choice of video conferencing and audio equipment
- Storage drawer options accommodate telepresence supplies
- Large work area with expandable surface feature

---

**CareLink™ Telepresence Cart**

The CareLink Telepresence cart is equipped to enable video communication to enhance your workflow with real-time consultations. This innovative telehealth workstation accommodates your choice of video conferencing technology enabling doctors and clinicians to connect with their patients.

**Features**
- Optional I/O Pod for integrating peripherals
- Optional mounts for video or web camera above the monitor
- Configurable with your choice of video conferencing and audio equipment
- Storage drawer options accommodate telepresence supplies
- On-board communication tools for messaging and service requests
- N-Sight™ fleet management for remote asset management

---

**CareLink™ Telemedicine Cart**

The CareLink Telemedicine Cart is designed to enable video communication and the use of diagnostic peripherals facilitating virtual care and timely diagnostics. CareLink connects doctors to remote patients in real time, increasing the access and timeliness to care.

**Features**
- Offers I/O Pod plug-n-play capabilities to integrate medical peripheral cameras and scopes
- Ventilated storage cabinet for housing PCs or Codecs
- Optional storage drawer for diagnostic peripherals
- Optional mounts for video or web camera above the monitor
- Supports single or dual monitor configurations
- On-board communication tools for messaging and service requests
- N-Sight™ fleet management for remote asset management
KIRBY LESTER
INVENTORY MANAGEMENT
Consider how you manage your physical inventory count, especially narcotics. Hand-counting or half bottle/full bottle estimations put your inventory integrity at risk. Capsa Healthcare provides Kirby Lester pharmacy automation to yield tighter inventory control.

**The Kirby Lester Difference**
- Maintain absolute inventory accuracy (manual counting methods are 95% accurate at best)
- Mandate narcotics double-counts
- 14.3 seconds faster (average) than hand-counting for a 90-count
- Counting speed up to 15/second

**Multiple Applications**
- Electronic C-II Log
- Perpetual inventory software
- Automated packaging device: cassette/cell inventory
- Returns and expired medication inventory tracking
- Retail pharmacy operation, for daily Rx filling

**Simple Inventory Counting: KL1**
14.6”(h) 12.5”(d) 5.6”(w); 6.9 lb

**Electronic C-II Log & Retail Rx Filling: KL1Plus**
14.6”(h) 12.5”(d) 8”(w); 9.6 lb

Count almost any tablet or capsule accurately & quickly
Eliminate inaccurate, inefficient manual counting
For higher-level controlled medication inventory
Keep a record of Rx fills and inventory (viewable on user portal)
Superior Products. Superior Service.
Capsa Healthcare provides a comprehensive service program focused on rapid resolution to keep your cart fleet operational, and your clinicians supported.
