CareLink™ Mobile Nurse Workstation

CareLink™ Nurse Workstations coupled with N-Sight™ provide an intuitive, flexible platform connecting IT to nursing, with ergonomic features and workflow solutions that enable clinicians to focus on what’s important: the delivery of patient care.

- Improve asset utilization
- Monitor power performance
- Data and PIN code management
- Streamline service and support

Elevating performance, every day.

M38e Workstation

The M38e features superior ergonomics, enhanced ease-of-use, and expanded storage flexibility to maximize clinical efficiency and elevate the performance of your health IT program.

NEW for M38e, add remote fleet management with the N-Sight™ Module to increase your fleet performance and value:

- Improve asset utilization
- Monitor power performance
- Streamline service and support

Fleet Management
N-Sight is a cloud-based system that enables hospital IT to remotely manage and monitor point-of-care carts used by clinicians. N-Sight facilitates improved asset utilization, maximizes fleet performance and value, and helps identify and prevent issues before they impact clinicians.

N-Sight Cloud Based Platform

Asset Utilization
N-Sight facilitates asset utilization through optimizing fleet deployment and maximizing the uptime and availability of carts.

Right-Size Your Fleet
• Evaluate utilization patterns and peak needs through Access Monitoring to determine if the number of carts in a unit or facility meet current clinical demands.
• Identify opportunities to redeploy carts to locations with greater needs, optimizing asset utilization.
• Cart fleet utilization reports can be exported for further review and distribution across your service and support teams.

Proactive Monitoring
• Maintain cart availability while proactively monitoring cart fleet power levels and performance throughout the facility or network of facilities.
• Power Analytics provides visibility into power usage and allows adjustments to technology settings to extend cart runtimes.

Training and Education
• Monitor fleet or individual cart charging activity and history to identify potential training and education opportunities to improve runtime and cart availability.

Remote Fleet Management
N-Sight saves IT time with managing their cart fleet and the administration of their fleet.

Intuitive Dashboard
• Illustrate current battery levels sorted from lowest to highest and summarize fleet performance over the past 24 hours, no more ‘moving nums’!
• Monitor fleet status and connectivity, showing carts that have not connected in the last 24 hours.
• View cart utilization and identify those that have not been accessed recently.

Remote User Management
• Remotely manage and update user IDs, PIN codes, and user permissions.
• Monitor cart access and security PIN codes being utilized.

Remote User Management
• Remotely manage and update user IDs, PIN codes, and user permissions.
• Monitor cart access and security PIN codes being utilized.

The N-Sight Difference
• Robust Cloud Solution: N-Sight is a cloud-based platform with no client software to install on facility desktop workstations or cart-based computers.
• Asset Utilization: Provides different analytic points to evaluate asset utilization and manage fleet deployment to ensure the right number of carts are in the right locations.
• User Administration: Enables remote management of cart user groups, user logins, PIN codes, and security settings for strict control over access.
• Configuration Settings: Centralized management of CareLink Cart configurations for Displays & Alerts, PINs, notifications, and service requests.
• N-Sight Admin N-Sight remote fleet management to your M38e carts to optimize fleet deployment and maximize cart uptime. Contact your Capsa Hospital System Regional Sales Manager for more details.

Integration With Hospital Systems
To facilitate communication between clinicians, IT, and other hospital departments, N-Sight offers integration with hospital systems that can accept email/SMTP input.

Service requests can be emailed to a specified address, integrating into Help Desk, Housekeeping, or other hospital systems.

Email alerts can be configured to notify the service team when carts have connectivity, battery or utilization issues so they can be quickly resolved.

Pin Code Interface
CareLink PIN Code Interface
An easy-to-use interface that provides better security and more value from fleet management. Users no longer have to enter and remember PIN codes, which promotes better workflow and leads to improved asset utilization and access monitoring analysis.

• Login and unlock bins or drawers using ‘Tap and Go’ badge readers or proximity sensors, single sign-on or EMR, including scanning patient’s wristband to unlock bin.
• Send pin code commands via a special USB cable to login or unlock bins or drawers. Includes optional lock and logout commands, in addition to auto-lock and auto-logout.

Active Directory
Active Directory Service for N-Sight
Administrators can directly from Microsoft Active Directory (AD). The simple utility maps attributes from AD to N-Sight providing easier user management, centralized management of security and improved asset utilization analysis.

• Integrates with existing AD processes used when users join and leave the organization.
• Utility on AD server manages a service to push updates to N-Sight at defined intervals, such as hourly or daily.
