Trio™ & CareLink™

Trio™ Computing Workstation

Trio™ is a blended design of the most innovative and reliable computing carts ever offered. Trio offers an ergonomic design coupled with innovative advances in ease of use, maneuverability, and power system runtime.

- Intuitive control center with simple touch screen navigation
- Personally-adjustable for optimal comfort with “memory” presets
- Slim workstation profile and lightweight design
- Scalable power system to meet any runtime requirement

CareLink™ Mobile Nurse Workstation

CareLink™ Nurse Workstations coupled with N-Sight™ provide an intuitive, flexible platform connecting IT to nursing, with ergonomic features and workflow solutions that enable clinicians to focus on what’s important: the delivery of patient care.

- On-board communication tools
- Fully-configurable storage and organization
- N-Stride steer assist for simple maneuverability
- Fully-configurable storage options

Elevating performance, every day.

N-SIGHT™ FLEET MANAGEMENT

CareLink™ Mobile Nurse Workstation

CareLink Nurse Workstations coupled with N-Sight™ provide an intuitive, flexible platform connecting IT to nursing, with ergonomic features and workflow solutions that enable clinicians to focus on what's important: the delivery of patient care.

- On-board communication tools
- Fully configurable storage and organization
- N-Stride steer assist for simple maneuverability
- Keyboard, work surface, and ground lights for working in darkened rooms
N-Sight™

Fleet Management

N-Sight is a cloud-based system that enables hospital IT to remotely manage and monitor CareLink or Trio point-of-care carts used by clinicians. N-Sight facilitates improved asset utilization, maximizes fleet performance and value, and helps identify and prevent issues before they impact clinicians.

N-Sight Cloud Based Platform

The N-Sight Difference

- Complete Fleet Management Package: Comprehensive platform streamlines remote fleet management and the administration of users of CareLink or Trio mobile computing carts across multiple locations or facilities.
- Asset Utilization: Provides 4 different analytic points to evaluate asset utilization and manage fleet deployment to ensure the right number of carts are in the right locations.
- User Administration: Enables remote management of cart user groups, user logins, PIN codes, and security settings for strict control over access.
- Configuration Settings: Centralized management of configurations for displays & peripherals, alerting, notifications, service requests and cart locations.
- Software Based Platform: N-Sight is a cloud-based platform with no client software to install.

Remote Fleet Management

N-Sight saves IT time with managing their cart fleet and the administration of their users.

Intuitive Dashboard

- Illustrates current battery levels sorted from lowest to highest and summarizes fleet performance over the past 24 hours, no more "making rounds" to assess cart fleet performance.
- Monitor fleet status and connectivity, showing carts that have not connected in the last 24 hours.
- View cart utilization and identify those that have not been accessed recently.

Remote User Management

- Remotely manages and updates user ID’s, PIN codes, and user permissions.
- Monitors cart access and security PIN codes being utilized.

Right-Size Your Fleet

- Evaluate utilization patterns and peak needs through Access Monitoring to determine if the number of carts in a unit or facility meet current clinical demands.
- Identify opportunities to redeploy carts to locations with greater needs, optimizing asset utilization.
- Cart fleet utilization reports can be exported for further review and distribution across your service and support teams.

Proactive Monitoring

- Maintains cart availability while proactively monitoring cart fleet power levels and performance throughout the facility or network of facilities.
- Power Analytics provides visibility into power usage and allows adjustments to technology settings to extend cart runtime.

N-Sight Asset Utilization

N-Sight facilitates asset utilization through optimizing fleet deployment and maximizing the uptime and availability of carts.

Right-Size Your Fleet

- Evaluate utilization patterns and peak needs through Access Monitoring to determine if the number of carts in a unit or facility meet current clinical demands.
- Identify opportunities to redeploy carts to locations with greater needs, optimizing asset utilization.
- Cart fleet utilization reports can be exported for further review and distribution across your service and support teams.

Proactive Monitoring

- Maintains cart availability while proactively monitoring cart fleet power levels and performance throughout the facility or network of facilities.
- Power Analytics provides visibility into power usage and allows adjustments to technology settings to extend cart runtime.

N-Sight Integration With Hospital Systems

To facilitate communication between clinicians, IT, and other hospital departments, N-Sight offers integration with hospital systems that can accept email/SMTP input.

Pin Code Interface

N-Sight PIN Code Interface

An easy-to-use interface that provides better security and more value from fleet management. Users no longer have to enter and remember PIN codes, which promotes better workflow and leads to improved asset utilization and access monitoring analysis.

- Login and unlock bins or drawers using "Tap and Go" badge readers or proximity sensors, single sign-on or EMR, including scanning patient’s wristband to unlock bin.
- Send pin code commands via a special USB cable to login or unlock bins or drawers. Includes optional lock and logout commands, in addition to auto-lock and auto-logoff.

Active Directory

Active Directory Service for N-Sight

Administer Cart Users directly from Microsoft Active Directory (AD). The simple utility maps attributes from AD to N-Sight providing easier user management, centralized management of security and improved asset utilization analysis.

- Integrates with existing AD processes when users join and leave the organization.
- Utility on AD server manages a service to push updates to N-Sight at defined intervals, such as hourly or daily.

N-Sight™

Asset Utilization

N-Sight facilitates asset utilization through optimizing fleet deployment and maximizing the uptime and availability of carts.

Right-Size Your Fleet

- Evaluate utilization patterns and peak needs through Access Monitoring to determine if the number of carts in a unit or facility meet current clinical demands.
- Identify opportunities to redeploy carts to locations with greater needs, optimizing asset utilization.
- Cart fleet utilization reports can be exported for further review and distribution across your service and support teams.

Proactive Monitoring

- Maintains cart availability while proactively monitoring cart fleet power levels and performance throughout the facility or network of facilities.
- Power Analytics provides visibility into power usage and allows adjustments to technology settings to extend cart runtime.

N-Sight Training and Education

- Monitor fleet or individual cart charging activity and history to identify potential training and education opportunities to improve runtime and cart availability.

N-Sight Email Alerts

- Email alerts can be configured to notify the service team when carts have connectivity, battery or utilization issues so they can be quickly resolved.

N-Sight Battery Issues

- Email/SMTP input.

N-Sight System Integration

To facilitate communication between clinicians, IT, and other hospital departments, N-Sight offers integration with hospital systems that can accept email/SMTP input.

N-Sight Pin Code Interface

An easy-to-use interface that provides better security and more value from fleet management. Users no longer have to enter and remember PIN codes, which promotes better workflow and leads to improved asset utilization and access monitoring analysis.

- Login and unlock bins or drawers using "Tap and Go" badge readers or proximity sensors, single sign-on or EMR, including scanning patient’s wristband to unlock bin.
- Send pin code commands via a special USB cable to login or unlock bins or drawers. Includes optional lock and logout commands, in addition to auto-lock and auto-logoff.

- User Administration: Enables remote management of cart user groups, user logins, PIN codes, and security settings for strict control over access.
- Configuration Settings: Centralized management of configurations for Displays & Alerts, PINs, Notifications, Service Requests and Cart Locations.
- Software Based Platform: N-Sight is a cloud-based platform with no client software to install on facility desktop workstations or cart-based computers.

N-Sight™

Asset Utilization

N-Sight facilitates asset utilization through optimizing fleet deployment and maximizing the uptime and availability of carts.

Right-Size Your Fleet

- Evaluate utilization patterns and peak needs through Access Monitoring to determine if the number of carts in a unit or facility meet current clinical demands.
- Identify opportunities to redeploy carts to locations with greater needs, optimizing asset utilization.
- Cart fleet utilization reports can be exported for further review and distribution across your service and support teams.

Proactive Monitoring

- Maintain cart availability while proactively monitoring cart fleet power levels and performance throughout the facility or network of facilities.
- Power Analytics provides visibility into power usage and allows adjustments to technology settings to extend cart runtimes.

Remote Fleet Management

N-Sight saves IT time with managing their cart fleet and the administration of their users.

Intuitive Dashboard

- Illustrates current battery levels sorted from lowest to highest and summarizes fleet performance over the past 24 hours, no more ‘troubleshooting’ to see what carts are performing poorly.
- Monitor fleet status and connectivity, showing carts that have not connected in the last 24 hours.
- View cart utilization and identify those that have not been accessed recently.

Remote User Management

- Remotely manage and update user IDs, PIN codes, and user permissions.
- Monitor cart access and security PIN codes being utilized.

N-Sight™

Integration With Hospital Systems

To facilitate communication between clinicians, IT, and other hospital departments, N-Sight offers integration with hospital systems that can accept email/SMTP input.

Service requests can be emailed to a specified address, integrating into Help Desk, Housekeeping, or other hospital systems.

Email alerts can be configured to notify the service team when carts have connectivity, battery, or utilization issues so they can be quickly resolved.

N-Sight™

Pin Code Interface

N-Sight PIN Code Interface

An easy-to-use interface that provides better security and more value from fleet management. Users no longer have to enter and remember PIN codes, which promotes better workflow and leads to improved asset utilization, accessibility, and security.

- Utility on AD server manages a service to push updates to N-Sight at defined intervals, such as hourly or daily.
- Integrates with existing AD processes when users join and leave the organization.
- No longer have to enter and remember PIN codes, which promotes better workflow and leads to improved asset utilization, accessibility, and security.

- Monitor fleet or individual cart charging activity and history to identify potential training and education opportunities to improve runtime and cart availability.

N-Sight®
Integration With Hospital Systems

To facilitate communication between clinicians, IT, and other hospital departments, N-Sight offers integration with hospital systems that can accept email/SMTP input.

Service requests can be emailed to a specified address, integrating into Help Desk, Housekeeping, or other hospital systems.

Email alerts can be configured to notify the service team when carts have connectivity, battery or utilization issues so they can be quickly resolved.

Email Alerts

- Battery Issues
- Connectivity Issues
- Security Issues
- Utilization Issues

Cart Locator

- Permits IT to locate displaced carts or those in need of service.
- Unit or floor locations can be given a name based on their wireless access point, so carts in need of service are more easily found.
Elevating performance, every day.
