Automation For Your Evolving

Three Brands.
One Partner.
Unlimited Potential.

Capsa Healthcare is uniquely positioned to develop customized solutions for any of your needs. Any of your pain points. Any of your dream-list projects. By bringing together three leading brands under one Pharmacy Automation North America division, our sales engineers can quickly analyze your business and present the right range of solutions. No other automation provider can match Capsa's breadth and depth. Or our expertise.

End-To-End Automation Solutions

Solutions For Any Pharmacy

- Regional and national chain pharmacy
- Independent pharmacy
- Institutional/LTC pharmacy
- Hospital outpatient pharmacy
- Mail order/central fill pharmacy

Business

Pharmacy's evolution away from counting pills to performing patient assessment activities is steadily progressing. This pivot-point stretches pharmacies to their limits. Capsa Healthcare is at the hub of this transition.

Our Kirby Lester Rx filling and RoboPharma central filling technology can revolutionize your pharmacy's workflow. Our automation has been proven to ease daily stressors, trim significant cost/labor/time, and help your staff do what they do best: counsel your patients.

Your Pharmacy's Excellence Is Our Goal

Efficient Rx Processing, Error Reduction

Kirby Lester Counters

Capsa's Kirby Lester line of Rx counters provide tighter control over inventory without having to invest time into oversight or calibration. Kirby Lester devices allow users to fill more accurately, cutting human error out of the equation, and saving time that could be better spent delivering direct patient care.

55%
time savings

100%
scripts verified

Kirby Lester KL1

Our simplest automation. Stop hand counting, and save time and money by eliminating overcounts and undercounts. Just pour and count – no calibration needed.

Kirby Lester KL1Plus

Scan-verify plus count every prescription to avoid filling errors. Includes electronic C-II log to manage narcotics inventory and fills. Verification software alerts if the wrong medication, dosage or quantity is chosen. Provides a 10-year record of every Rx fill. Biometric user login and interfacing.

Daily Volume Increase, Labor Savings

Kirby Lester Robotics

Capsa's Kirby Lester automated prescription filling counters and robots deliver a multitude of benefits, like freeing up the staff's time to focus on value-added services. Choose your level of automation based on your volume, workflow, space, etc. Any system you choose will cut filling errors and time, and lower inventory and operational costs in the long term.

>60%
total orders
automated

Kirby Lester KL108

Secure pharmacy robot fully automates 108 medications (50-60% or more of total daily orders) for significant labor savings. Industry-first cassette calibration system: universal locking cassettes, never need adjustment, guard against unauthorized access. Full user tracking and reporting.

The Right Technology Leads To Staff Satisfaction

The upfront investment in technology is greatly offset when those tools replace real and perceived monotonous tasks and increase personal output. Three-quarters of U.S. workers say having the right equipment for the job affects their daily outlook.*

Central Fill/Mail Order

RoboPharma Automation

There is never ONE best solution for every situation. There's only YOUR best solution. Capsa's RoboPharma team understands that better than anyone. It's one of the reasons why RoboPharma is the fastest growing global brand for high volume and high speed automation. Our engineers are experts at simplifying complex problems, then creating customized plans to automate the entire process – or just a portion – of your mail order or central pharmacy.

Our Design Principles

Fast

Our solutions allow you to fill more scripts with fewer FTEs, which means greater efficiency.

Reliable

Pharmacies equipped with RoboPharma automation have experienced 99.99% reliability.

Compact

Thanks to our flexible design principles, RoboPharma automation can optimize your available space to meet your growing needs.

Simple

With our innovative modular architecture, RoboPharma automation can expand whenever your capacity does.

Central Fill/Mail Order

RoboPharma Automation

Are you filling 1,000 or 100,000 Rx per shift? What is your mix of oral solids, unit of use, and bulk? How is inventory managed and streamlined? What is your 5-year expansion plan?

Our RoboPharma designs can accommodate any mix, any volume, any geography, any special constraints. Our designs are a symphonic blend with multiple QC points built in.

What We Deliver

Cost Reduction

Designed to reduce FTE, inventory, space, and power, and eliminate downtime.

Modularity

Software and hardware designed for your volume and your available footprint.

Ready For The Future

Our solutions allow you to grow and meet increased volumes in 1 year, or 10 years.

Sophisticated Interoperability, Simplified

- Integration and software
- Inventory management and tracking
- Workflow and conveyance
- Dispensing automation
- Sortation, packaging, shipping
- Expert installation, training and 24/7 support

Health System Outpatient Pharmacy

Kirby Lester Automation

Outpatient pharmacies have unique needs like concierge programs, revenue generation, long-term space planning, specialty medications. These are in addition to the core function of processing prescriptions quickly. Capsa's full line of pharmacy automation fills any concern, from C-II inventory management to error-free dispensing to staff redeployment for patient programs.

Will Call Automation

scripClip™

Explore this unique software/hardware suite that delivers substantial time and labor savings for your will call and return-to-stock processes. scripClip features pick-to-light and LED-enabled hanging Rx bags. The intuitive system guides pharmacy staff in every step of order preparation, storage, retrieval, and returns – without mistake or waste.
