# Warranty, Service, & Support

**Superior Service. Superior Products.**

Capsa Healthcare provides a comprehensive service program focused on rapid resolution to keep your pharmacy operational, and your clinicians supported.

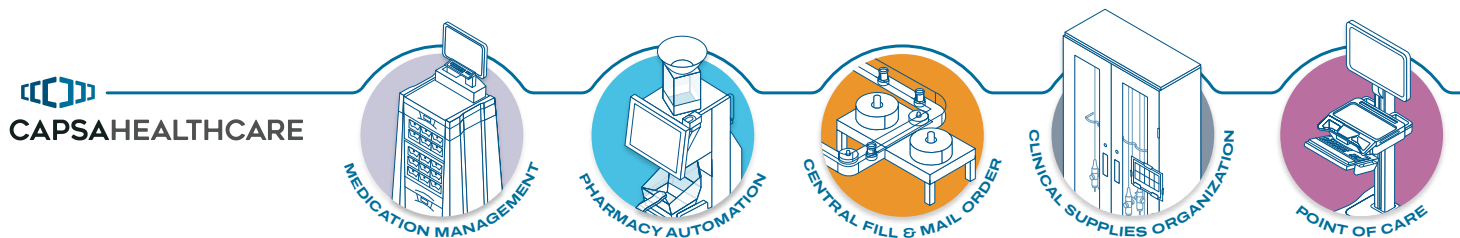

Contact your Capsa Representative for more information about Capsa's warranty and service programs.

- Expert direct phone support available during normal business hours
- 24/7 emergency technical support
- National team of field support technicians
- Support via email available at [techsupport@capsahealthcare.com](mailto:techsupport@capsahealthcare.com)
- On-site technical service and support available

# Engineering a Path to Better Care.

Across the healthcare continuum, Capsa stands out as the leader in purposefully designed, integrated solutions for **pharmacy automation, medication management, and point-of-care technologies.**

Capsa has partnered with healthcare providers for more than 60 years to engineer innovative answers for complex challenges. Our solutions **optimize workflows, streamline repetitive tasks, and improve clinical efficiency.** From automating pharmacy operations to enhancing patient engagement, Capsa is **engineering a path to better care.**

## What We Commit To

Making delivery of healthcare easier for providers, allowing them to focus on patients, not processes.

Streamlining workflows across the care continuum with solutions designed to simplify care delivery while optimizing efficiency, accuracy, and ROI at every point of care.

Providing purpose-built platforms and custom configurations that address your pain points and anticipate your future needs.

Re-engineering healthcare processes that fuel productivity with automated solutions that set a new standard for performance and accuracy.

# End-to-End Pharmacy Solutions

Capsa Healthcare is dedicated to providing comprehensive pharmacy solutions that address the unique needs of various dispensing environments. Our innovative products and technologies optimize workflows, eliminate repetitive tasks, and enhance operational efficiency, enabling providers to focus on delivering superior patient care.

## Dispense

Our advanced automation streamlines the medication dispensing process, ensuring accuracy and efficiency. From Kirby Lester counters to the KL108 and RP20 robotic systems, Capsa's technologies automate the counting and preparation of medications, reducing human error and freeing up staff to focus on value-added services.

## Distribute

Capsa Healthcare offers a comprehensive range of medication carts, from standard models to tech-integrated solutions. Our medication carts support diverse healthcare environments by providing secure and efficient medication distribution, seamlessly integrating with electronic health records and other clinical systems.

## Deliver

For high-volume central fill pharmacies, Capsa provides customizable automation solutions capable of processing from 1,000 to over 100,000 scripts per shift. These systems optimize workflows, reduce errors, and maximize floor space. Additionally, our will call and prescription pickup systems, like RoboWall and scripClip, improve patient satisfaction by streamlining prescription retrieval and reducing wait times.

**Trust Capsa to transform your pharmacy operations and engineer a path to better care.**

**YOUR PHARMACY'S  
EXCELLENCE IS  
OUR GOAL**

**STAFF  
SATISFACTION**

**PROVEN TIME  
SAVINGS**

**ASSURED  
ROI**

**FULL RANGE OF  
AUTOMATION**

**LABOR  
REDUCTION**

**QUALITY  
CONTROL**

## KL1

**TABLET  
COUNTER**

### OUR SIMPLEST AUTOMATION

Stop hand counting and save time and money by eliminating over and under counts. Just pour and count—no calibration needed.

Trusted across the globe, the unique KL1 counts almost any tablet or capsule quickly, conveniently and accurately.

## KL1Plus

**WITH AURA**

### AUTOMATED PILL COUNTING WITH Rx VERIFICATION

The KL1Plus is a multi-functional tool that ensures fast and accurate prescription processing in any community pharmacy.

The computerized scan-verification checks that each prescription has been filled properly.

# Efficient Rx Processing & Error Reduction

Capsa's Kirby Lester devices allow users to fill prescriptions more accurately, cutting human error out of the equation and saving time that could be better spent delivering direct patient care.

**55%** TIME  
SAVINGS

**100%** SCRIPTS  
VERIFIED

# Enhance Workflow and Accuracy

Capsa Healthcare's robotic dispensing systems, the KL108 and RP20, offer advanced automation solutions to streamline your pharmacy operations. Both systems reduce errors, save time, and lower inventory and operational costs, enabling your staff to focus on delivering superior patient care. Choose Capsa's innovative solutions to optimize efficiency and achieve your pharmacy's goals with precision and reliability.

## VIAL DISPENSING AUTOMATION

### KL108 VIAL DISPENSING ROBOT

The KL108 efficiently manages the filling of your pharmacy's 108 most common oral solids. With medication stored in secure, locked cassettes, your pharmacy can automate 60% or more of daily prescriptions, without sacrificing security. This automation frees staff to focus on customer interactions and expanded pharmacy services, enhancing overall patient care.

**MORE THAN 60% TOTAL ORDERS AUTOMATED**

## HIGH-DENSITY UNIT-OF-USE DISPENSING

### RP20 PACKAGE DISPENSING ROBOT

Capsa Healthcare's RP20 package dispensing robot automates the storage and dispensing of unit-of-use packages, ensuring accuracy and efficiency in your pharmacy operations. Designed to handle high volumes, the RP20 reduces manual labor, cuts down on errors, and optimizes workflow. This advanced system allows your staff to dedicate more time to patient care and other value-added services, enhancing productivity and satisfaction.

**18k MAX PACKAGE CAPACITY**

# Secure, Automated Medication Dispensing

Capsa's NexsysADC and NexPak systems offer secure, automated medication dispensing. NexsysADC enhances medication security and minimizes errors, while NexPak streamlines packaging, ensuring accuracy and efficiency. Optimize your pharmacy operations and focus more on patient care.

## Nexsys ADC

### AUTOMATED DISPENSING CABINET

The NexsysADC system provides secure, automated dispensing for medications and supplies. Designed to enhance security and accountability, NexsysADC minimizes medication errors, reduces waste, and improves inventory management, relieving the stress of managing Stat doses and controlled substances.

**TRACK & TRACE  
MEDICATION  
CONTROLS**

## NexPak

### AUTOMATED PACKAGING SYSTEM

NexPak enables your pharmacy to quickly adopt automated strip packaging, with innovative options for central pharmacy and in-facility dispensing. NexPak improves the daily medication administration process, proactively reduces the risk of wrong or skipped doses, and increases patient compliance.

**VERSATILE UNIT  
& MULTI-DOSE  
PACKAGING**

# Secure & Scalable Distribution

Our versatile range of medication carts supports the safe and efficient distribution of medications across various healthcare settings. With options from simple, non-powered models to advanced, computer-integrated systems, we provide robust solutions tailored to meet the unique needs of each facility.

## RELIABLE MEDICATION DISTRIBUTION

### STANDARD MEDICATION CARTS

Modern medication storage and organization requires an attractive, configurable medication cart design that offers maximum capacity, durable construction, and premium workflow accessories. These requirements come standard with every Capsa Healthcare medication storage cart model. Enjoy enhanced pharmaceutical and supplies storage and organization, solutions for controlled medication safety, and the ability to mobilize electronic health records (EHR/EMR) with any of our extended care medication carts and medical carts.

## HIGH CAPACITY WITH FULL COMPUTING

### TECH INTEGRATED MEDICATION CARTS

Our Tech-Ready Medication Cart line can turn any conventional Capsa medication cart into a mobile computer cart. Available in Avalo, Vintage Encore, and M-Series styling, this product enhancement equips your cart with an integrated slide-out keyboard and mouse drawer; adjustable arms for computers, tablets and laptops; hidden and organized cord management. All to simplify management of electronic health records.

# Scalable High Volume Automation

Reimagining your central fill operation begins with looking forward. Our team of automation and engineering experts works with you to understand your needs and define success. What are your goals for scripts per shift? Uptime? KPI analytics? Platform support and ongoing consultation?

With a comprehensive understanding of your objectives, we work alongside your project team to design a custom configuration that addresses your pain points and anticipates your future needs. Every aspect of your solution is the result of this collaborative process.

## WHAT WE DELIVER

# 100,000+

From 1,000 to 100,000+ Scripts-per-Shift with automation specifically designed for Central Fill

## 80%

Automate up to 80% of unit of use dispensing

## 90%

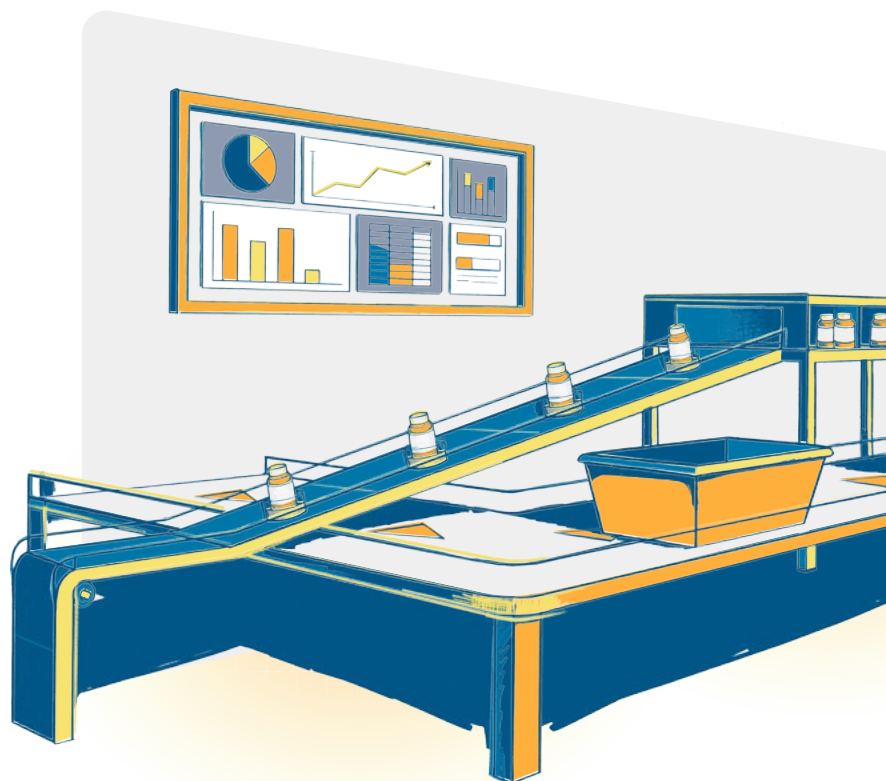

Automate up to 90% of oral solids

## 50%

Save 50% in labor costs or more

## 50%

Save up to 50% of floor space

# Secure, Automated Medication Dispensing

## scripClip™

### Rx RETRIEVAL GUIDE SYSTEM

scripClip is a unique software and hardware suite that delivers substantial time and labor savings for the will call and return-to-stock processes.

scripClip features pick-to-light and LED-enabled hanging Rx bags. The intuitive system guides pharmacy staff in every step of order preparation, storage, retrieval, and returns – without mistake or waste.

CAPSA HEALTHCARE IS AN AUTHORIZED  
DISTRIBUTOR OF SCRIPCLIP

## RoboWall

RoboWall is an automated 24/7 prescription pickup center, enhancing customer experience and reducing wait times.

RoboWall streamlines the Rx retrieval process: The pharmacy stores completed orders inside the secure carousel system, where patients retrieve their order when it's convenient, at any hour of the day.

### AUTOMATED PRESCRIPTION PICKUP

# Safe & Efficient Medication Delivery

Through proprietary software and hardware integration, intelligent storage and organization, compact design, and advanced security, Capsa Healthcare's medication computing workstations ensure a safe and accurate medication delivery process. Medication workstations offer configurable storage to meet varying medication delivery requirements. Storage options support simple to complex medication administration workflows, facilitate closed-loop medication management systems, and aid in reducing medication errors from pharmacy to patient bedside.

## VERSATILE MOBILE COMPUTING

### TRIO MEDICATION CARTS

The Trio Medication Workstation is a mobile medical cart that combines innovative advancements with flexible storage options to meet the needs of clinical users today and into the future. Trio offers a refined, ergonomic design style coupled with ease of use, maneuverability, and the scalable, reliable GoLiFe power system.

## CLOSED-LOOP MEDICATION MANAGEMENT

### MEDLINK MEDICATION MANAGEMENT CART

MedLink™ is a medication management system that ensures safe, accurate medication administration. It's specifically designed to reduce human error, keep patients safe, and create a closed-loop medication system using lockable drawers and patient wristband scanning. This ensures each patient receives the correct medication while allowing caregivers to focus on patient care.
