

End-to-End Healthcare Solutions

Engineering a Path to Better Care

Where Patients, Providers, and Technology Connect

Across the healthcare continuum, Capsa stands out as the leader in purposefully designed, integrated solutions for pharmacy automation, medication management, and point-of-care technologies.

Clinical Supply Organization

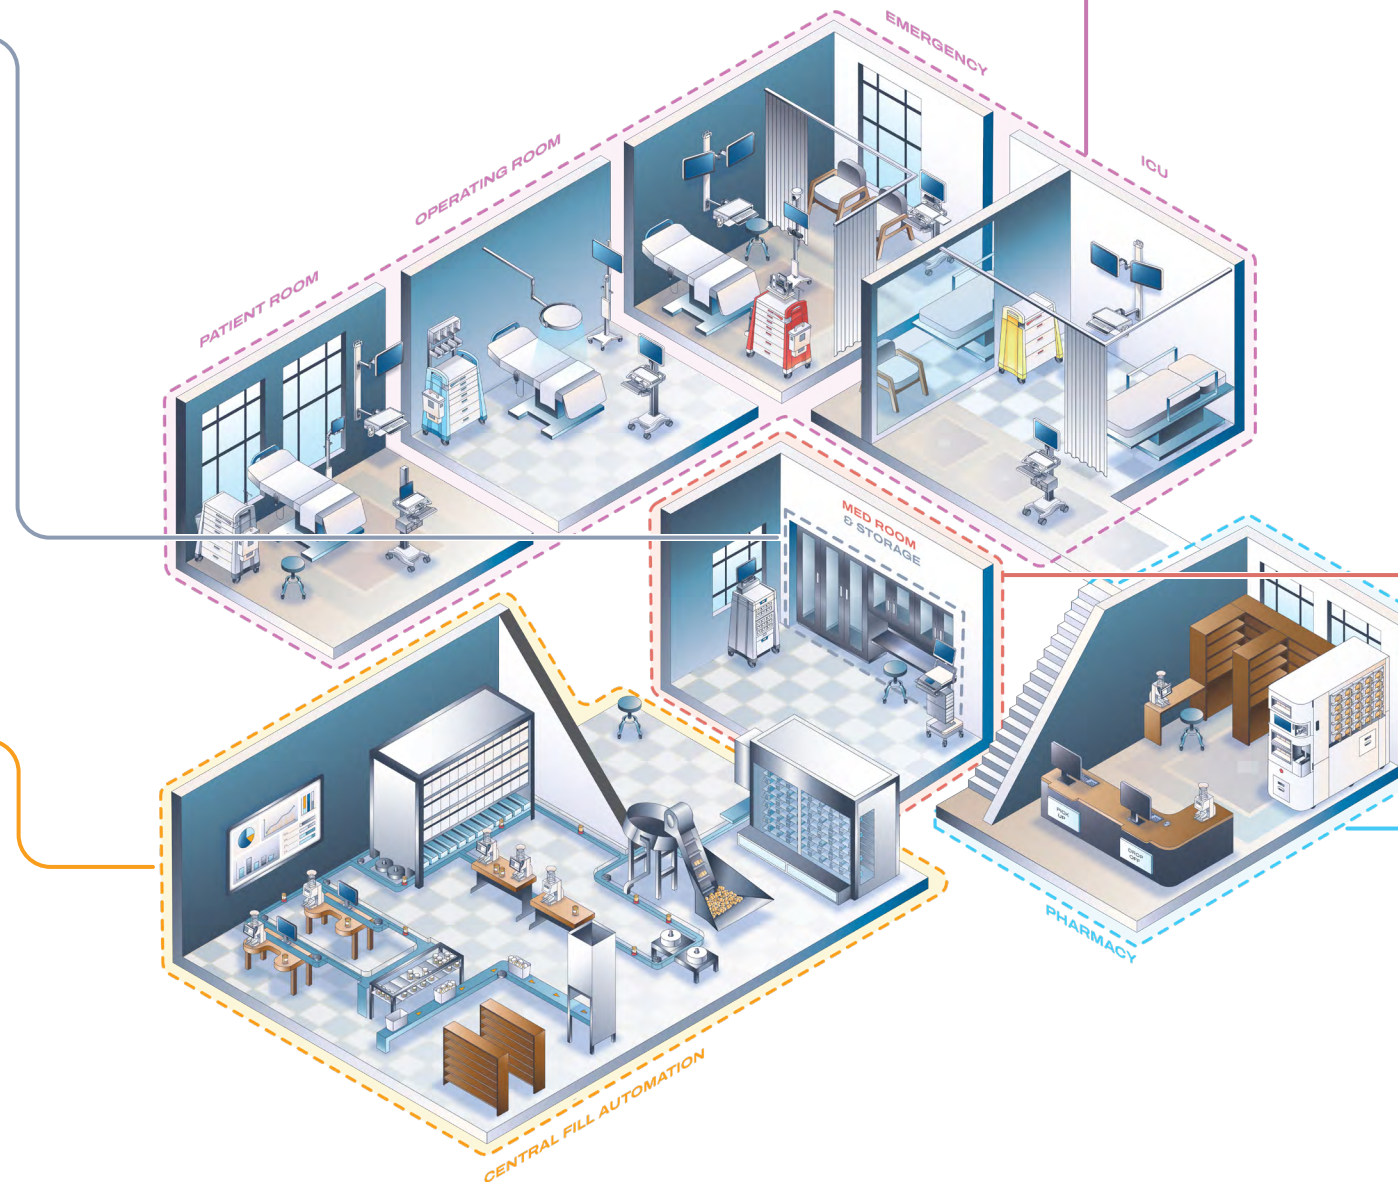

Medical Procedure Carts: Fully configurable carts for diverse clinical use cases including emergency intervention and anesthesia.

Storage and Drying Cabinets: Flexible storage solutions for organizing clinical and procedural supplies including specialized endoscopy storage cabinets designed to control cross contamination.

Central Fill

Capsa Healthcare's systems are designed with modular scalability, allowing pharmacies to expand capacity without costly overhauls and downtime. **The industry leading** High-Volume Counting Cell (HVC) maximizes space efficiency, processing 3.55 scripts per square foot—**more than 2 times the current industry norm.**

Point-of-Care Solutions

Computing Workstations: Ergonomically designed carts providing caregivers with reliable access to Electronic Health Records (EHR) and supporting efficient medication delivery.

Specialty Carts: Tailored solutions for specific clinical needs, including phlebotomy and fetal monitoring, enhancing workflow efficiency.

Medication Management

Medication Carts: Configurable carts designed for secure storage and easy access to medications, optimizing workflows and reducing errors.

Automated Dispensing Cabinets: Secure, user-friendly systems for medication dispensing, enhancing patient safety and inventory control.

Pharmacy Automation

Pill Counters and Robotic Dispensing: Automation technologies for medication counting and preparation, reducing errors and freeing staff for patient care.
